

J. Edwards Associates, LLC. provides exceptional civil engineering and surveying services throughout Connecticut. We regularly work with many types of people and clients including Architects, Attorneys, Condominium Associations, Contractors, Corporate Campuses, Developers, Engineering Companies, Environmental Professionals, Homeowners, Hospitals, Municipalities, Realtors, and Schools. Our civil engineers and property surveyors are critical to your project's success, and as such, it's best that we're involved throughout the process.

---

### [Civil Engineering](#)

Civil Engineer's work to keep infrastructures up to date with safety features and continue to modernize the appearance of them as well. From twenty-story buildings to roads and canals, our professional team of civil engineers are ready to help your Connecticut assignment be completed efficiently and accurately. Our services range from permits, files, and plans to testing and inspections. Our team can also help you design your entire project from scratch. Once we discuss your project more in depth, we'll decide on the best approach to take together.

### [Land Surveying](#)

Professional property surveyors are at your disposal when you work with J. Edwards Associates, LLC. Our property surveyors should always be the first people who look at your site to ensure accurate measurements, adherence to regulations, and more. We want all of our Connecticut roads, buildings, and other structures to be correctly implemented into our developing society.

### **Choosing J. Edwards Associates, LLC.**

We provide all of our clients with a contract that fully explains the methods and procedures we take to help your company complete your assignment. Our civil engineering and surveying services keep you informed about every detail. When you work with us, there are no surprises.

[Contact J. Edwards Associates, LLC.](#) to talk with one of our professional civil engineering and property surveyors about your next Connecticut construction assignment. Our experienced civil engineering and property surveyors will make sure your project proceeds smoothly through completion.
